

TM
and Green Lightning BOOSTER

(1 x Cubic Foot = 6.23 gallons 1 x Cubic Metre = 220 gallons = 1000 litres)

Firstly determine the size of your pond. Measure the length by the breadth by the depth. Convert to Gallons. You can use the chart shown on our site to do this

<https://blanketweed.info/pond-volume.html>

PLEASE NOTE THAT GREEN LIGHTNING IS ONLY AVAILABLE IN small bags of 100gm and normal 450gm bags WATER SOLUBLE BAGS.

These water soluble bags are themselves packed in outer non water soluble zip-lock bags so please REMOVE the soluble bags from the outer before use.

Instructions. Throw water soluble bag/bags into centre of pond or near where the weed is worst. The water-soluble bag dissolves releasing contents.

Totally safe to plants and animals (except Blanket Weed)

NB: THE MINIMAL OPERATIONAL TEMPERATURE IS 10°C If the pond temperature is below 10°C then empty contents into a bucket of POND water and leave in a warm room overnight. Pour in pond next day. DO NOT USE TAP WATER as this contains biocides which kill the Green Lightning bacteria.

GREEN LIGHTNING BOOSTER can be used to enhance the performance of Green Lightning. Use in the doses ratio of approximately 1 Booster to 10 Green Lightning. Available in 10gm and 50gm bags use with 100gm and 450gm of Green Lightning accordingly. NB: The Green Lightning Booster is in plain Ziploc bags which are not water soluble so remove contents before application.

Green Lightning Booster is refined natural minerals which increases the oxygen level of the water to help the activity of Microbes in Green Lightning.

DOSES: Our smallest bag is 100gms which treats a maximum of 5000 gallons. For ponds under 5000 gallons use 50gms (approx.) for 2500 gallons and 33gms (approx.) for 1250 gallons. Keep unused contents in dry storage.

MAINTENANCE DOSE: Use HALF initial dose every 30 days (very important)

TURN OFF U.V. LIGHT DURING USE. KEEP FOUNTAIN/AERATION ON ESPECIALLY IN WARM WEATHER.
